# 3 WAY SOLENOID VALVES.

for Air, Gas, Water and Light Hydraulic Oil. 1/8" & 1/4" BSP/NPT

**SERIES FD 300** 

◆FLOCON 3 Way direct operated solenoid valves compact brass stainless steel and aluminium bodies with soft seating for tight shut off. No minimum operation pressure is required for operation. Its miniature size makes it ideal for application where space is a limitation. These 3 Way solenoid valves control the flow of air and gases by applying pressure to and venting pressure from cylinders and diaphragms. They are mainly used in applications such as pilot operators, single acting cylinders, air compressors and instrumentation.

# SPECIFICATIONS: **OPERATION:**

Normally closed-applies pressure when solenoid is energised, exhausts pressure when solenoid is deenergised.

#### VALVE:

- · Brass, stainless steel or aluminium **bodies**
- · Direct operated
- · Resilient seating for tight shut off.
- Pipe connections suitable for 1/8" & 1/4" BSP/NPT
- Operating pressure from 0 to 10kg/cm2

#### SOLENOID:

- General purpose solenoid enclosure (NEMA 1) Weather proof solenoid enclosure (NEMA 2 & 3R)
- All solenoid parts in contact with fluid are made of series 300 and 400 stainless steel .:
- Continuos duty mouded coil
- Class F insuation

#### Coil Voltages:

24, 48,110, 230, 440 V AC 24, 48, 110, 230 V DC FREQUENCY OF OPERATION: 650 CYCLES PER MINUTE

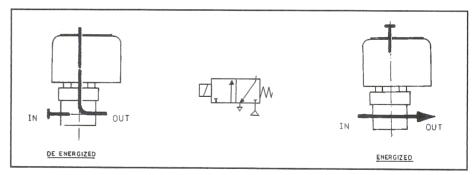

### **FEATURES:**

- Direct operated
- Miniature size
- Packles
- Silent in operation
- Solenoid capable of being turned
- Can be mounted directly on pipe.

**◆FLOCON** valves are made from quality materials and rigorously tested for leakage and performance.

Each valve is subjected to twice the rated voltage plus 1,000 vlots at 50 c/s for 60 seconds for Insulation Test.

	Valve Series	Pipe Size BSP/NPT	Office Size (mm)	Maximum Operating Pressure Differential (in Kg/cm²)					· Woking (Kg/cm²)	Fluid	Factor
